## **CHILD DEVELOPMENT RESOURCES FOR PARENTS AND PROVIDERS**

“Child development” describes the process of children accruing the ability to do increasingly difficult or complex activities as they grow older. Child development is separated into five categories: cognitive, language, motor, sensory, social and emotional.

- ◆ Cognitive development is the process by which children think, learn, understand, problem-solve, reason, and remember.
- ◆ Language development is the process by which children learn to speak sounds, words, and sentences to communicate with others, and to use or understand body language, gestures, and what others say.
- ◆ Motor development is the process by which children learn to use their muscles to move. It is separated into two categories:
  - Large, or gross, motor development—when children learn to use their large group muscles to sit, stand, walk, run, keep balance, and change positions; and
  - Small, or fine, motor development—when children learn to use small muscles in their hands to eat, draw, dress, play, and write.
- ◆ Sensory development is the process by which children hear, see, taste, touch, smell, and feel.
- ◆ Social and emotional development is the process by which children learn to relate to others, such as having relationships with family, friends, and teachers; and how they learn to cooperate and respond to the feelings of others and develop control over their emotions.

Parents and other adults, such as grandparents and child care providers, play important roles in a child’s development. The environment is also an important factor in development because it stimulates learning. Providing stable relationships that are socially and emotionally nurturing, and environments that are safe and age appropriate are essential to healthy human development.

Parents and providers may have questions about how to support children's development and how to establish developmentally appropriate environments. This resource guide is designed to help parents and providers find information, which is divided into the following sections:

- ◆ [Developmental Milestones](#);
- ◆ [Early Learning](#);
- ◆ [Environment, Health, and Safety](#);
- ◆ [Social and Emotional Development](#); and
- ◆ [Learning Activities and Teaching Materials](#).

## Developmental Milestones

[Back](#)

This section offers parents and child care providers information about developmental milestones, developmental delays, and developmental screening tools.

Providers may want to contact their State professional development agency to learn whether there are child development and developmental delay trainings they must complete under State requirements. Contact information for all State agencies is available at <http://nccic.acf.hhs.gov/statedata/dirs/display.cfm?title=pd>.

### What are developmental milestones? What are developmental delays?

Developmental milestones are activities that most children are expected to learn how to do by a certain age. As a child grows, he/she is expected to learn activities relating to his/her social-emotional, physical, cognitive, and speech and language development. Although these milestones are based on age, achieving them varies from child to child. Parents and providers can help children reach a developmental milestone by talking or playing with them, or providing an environment that stimulates development.

Developmental delay refers to the child's inability to learn or master an expected activity within his/her age range. Developmental delays could be the result of external or internal factors, such as lack of environmental stimulation, premature birth, and/or a learning disability. Parents and providers can help children by learning the signs of developmental delay and knowing when to refer children to early intervention.

The following organizations provide information about developmental milestones and developmental delays.

#### **American Academy of Pediatrics (AAP)**

847-434-4000

[www.aap.org](http://www.aap.org)

AAP works to provide general health and well-being information for parents of children up to age 21. The AAP Web site offers information on children's health, including development and developmental delays. AAP resources on child health and development are available at [www.aap.org/topics.html](http://www.aap.org/topics.html).

### **Centers for Disease Control and Prevention (CDC)**

U.S. Department of Health and Human Services  
800-311-3435  
[www.cdc.gov](http://www.cdc.gov)

CDC's mission is to protect and improve the health and safety of the general public. Its Web site offers information about child development and developmental delays at [www.cdc.gov/ncbddd/child/development.htm](http://www.cdc.gov/ncbddd/child/development.htm).

### **Talaris Research Institute**

206-529-6898  
[www.talaris.org](http://www.talaris.org)

Talaris is dedicated to discovering how children think, feel, and learn. It also produces a research-based timeline that can serve as a general guide to how children grow. The timeline is available at [www.talaris.org/timeline.htm](http://www.talaris.org/timeline.htm).

### **What is a developmental screening?**

A developmental screening is a procedure for health practitioners, parents, and/or child care providers to identify whether children are developing within the expected typical range. Screening can result in earlier detection, identification, and treatment of developmental delays.

The following resources provide additional information about developmental screenings, disabilities, and autism.

### **First Signs, Inc.**

### **How will I know when a child is ready to be toilet trained?**

Toilet training may be an exciting and stressful time for children, parents, and providers. Knowing when to start toilet training varies from child to child; while there is no set age to start, parents and providers may get their cues by paying attention to a child's physical and psychological development.

AAP offers the following questions to help parents and providers determine whether a child is ready. Does the child:

- ◆ Stay dry during the day (or for at least 2 hours of the day) and/or is dry after naps?
- ◆ Have regular and/or predictable bowel movements?
- ◆ Have postures, words, and facial expressions that indicate he will urinate or have a bowel movement?
- ◆ Follow simple instructions?
- ◆ Help to undress herself and walk to and from the bathroom?
- ◆ Tell you he wants to be changed and seems uncomfortable with a dirty diaper?
- ◆ Ask to use the potty chair, bathroom, and wear "grown-up" underwear?

Additional information about toilet training is available on the AAP Web site at [www.aap.org/publiced/BR\\_ToiletTrain.htm](http://www.aap.org/publiced/BR_ToiletTrain.htm).

The following resources provide toilet training information for parents and providers:

## Early Learning

[Back](#)

As children grow and advance in their development, they are also able to learn new skills and abilities. This section provides information and resources about brain development and how children learn language and literacy skills.

Child care providers may want to contact their State professional development agency to learn whether they must complete trainings on early learning under State requirements. Contact information for all State agencies is available at <http://nccic.acf.hhs.gov/statedata/dirs/display.cfm?title=pd>.

## How does a child's brain develop?

Technological advances in the past decade have allowed scientists to study the brain in ways that have led to new understanding about how young children develop. There is new knowledge of both the capabilities and vulnerabilities of infants and young children, and this understanding has influenced the interaction and work of parents and providers.

The following organizations provide information about brain development in young children:

### Neuroscience for Kids

<http://faculty.washington.edu/chudler/neurok.html>

Neuroscience for Kids has been created for students and educators alike to obtain useful, easy-to-understand information about neuroscience. The Web site includes a section titled "Explore the Nervous System" with information about the brain and its development. This resource is available at <http://faculty.washington.edu/chudler/dev.html>.

### Early Literacy and Language Development

Recent research has brought about a new understanding of how infants, toddlers, and preschoolers learn language and early literacy skills. This research has influenced formal and informal strategies that parents and early childhood educators use to help young children arrive at kindergarten with the early literacy skills and motivation they need to become competent readers by third grade.

The following publications provide information on early literacy and learning in children birth to age 5 for early childhood educators and parents.

<http://illinoisearlylearning.org/tipsheets-sp/spankingalternatives-sp.htm> (Spanish);  
<http://illinoisearlylearning.org/tipsheets-pol/spankingalternatives-pol.pdf> (Polish)

Parents and child care providers may want to contact their State licensing agency for information about regulations regarding corporal punishment in child care settings established by their States. Contact information for all State licensing agencies is available at <http://nccic.acf.hhs.gov/statedata/dirs/display.cfm?title=licensing>.

### **How can I help a child who is grieving?**

Understanding death and the process of grief is different for all children. Parents and child care providers may find it difficult to talk to children about death, because they may also be coping with the pain of losing a loved one or may be afraid of causing additional pain.

The following organizations provide information about children and grief and how parents, child care providers, and other adults may help children understand death and handle grief.

#### **Bereaved Parents of the USA (BP/USA)**

708-748-7866

[www.bereavedparentsusa.org/index.htm](http://www.bereavedparentsusa.org/index.htm)

BP/USA offers support to bereaved parents, siblings, grandparents, and others who have experienced the loss of a child. Information is available in Spanish at

[www.bereavedparentsusa.org/BPenEspanol.html](http://www.bereavedparentsusa.org/BPenEspanol.html).

#### **Children's Grief Education Association (CGEA)**

877-722-2319

[www.childgrief.org/childgrief.htm](http://www.childgrief.org/childgrief.htm)

CGEA is dedicated to providing information, education, and support to grieving children and their families.

#### **The Compassionate Friends (TCF)**

877-969-0010

[www.compassionatefriends.org](http://www.compassionatefriends.org)

TCF assists families in the positive resolution of grief following the death of a child and provides information to help others be supportive.

#### **The Dougy Center for Grieving Children and Families**

886-775-5683

[www.dougy.org](http://www.dougy.org)

## Curricula

### Active Learning

Frank Porter Graham Child Development Institute  
University of North Carolina at Chapel Hill  
[www.fpg.unc.edu/~ecers/rw\\_als.htm](http://www.fpg.unc.edu/~ecers/rw_als.htm)

The Active Learning series, published by the Pearson Learning Group, devotes a volume to each age group: infants, 1-year-olds, 2-year-olds, 3-year-olds, 4-year-olds, and 5-year-olds, as well as children with disabilities.

### Bank Street Developmental Interaction Approach

[www.bankstreet.edu/sfc/developmental\\_interaction.html](http://www.bankstreet.edu/sfc/developmental_interaction.html)

The program recognizes that while development occurs on a continuum, it happens at different times for different children. Teachers rely on research and practice to choose topics and design experiences that will engage and challenge children. The following resource is available:

- ◆ The *Bank Street School for Children Curriculum Guide*.  
<http://webstaging.bankstreet.edu/gems/sfc/CurriculumGuide.pdf>.

### The Creative Curriculum®

Teaching Strategies, Inc.  
[www.TeachingStrategies.com](http://www.TeachingStrategies.com)

The Creative Curriculum series, developed by Teaching Strategies, Inc., includes specific resources for curriculum development for infants and toddlers, preschool-age children, school-age children, and children in family child care.

### Developmentally Appropriate Practices (DAP) Approach

DAP provides a safe and nurturing environment that promotes the physical, social, emotional, aesthetic, intellectual, and language development of individual children at every age while being sensitive to the needs and preferences of families. Knowledge about how children develop and learn is applied in program practices. The following documents have information about developmentally appropriate practices.

- ◆ *Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth through Age 8* (July 1996), a position statement of NAEYC.  
[www.naeyc.org/about/positions/pdf/PSDAP98.PDF](http://www.naeyc.org/about/positions/pdf/PSDAP98.PDF)
- ◆ *Developmentally Appropriate Practice in Early Childhood Programs Serving Children From Birth Through Age 8*, revised edition (1997), eds. Carol Copple and Sue Bredekamp, published by NAEYC. Additional information about this publication is available at [http://sales.naeyc.org/Itemdetail.aspx?Stock\\_No=234&Category](http://sales.naeyc.org/Itemdetail.aspx?Stock_No=234&Category).

### **High/Scope®**

High/Scope Educational Research Foundation  
[www.highscope.org](http://www.highscope.org)

The High/Scope educational approach is a set of guiding principles and practices that adults follow as they work with and care for infants and toddlers, preschoolers, and elementary and adolescent students.

### **The Program for Infant/Toddler Care (PITC) Curriculum**

WestEd PITC  
[www.pitc.org](http://www.pitc.org)

The PITC Curriculum is a comprehensive training system to help caregivers of infants and toddlers provide healthy, emotionally secure, and intellectually rich experiences in care.

### **Association Montessori International/USA (AMI)**

[www.montessori-ami.org](http://www.montessori-ami.org)

The Montessori Method develops children's senses, academic skills, practical-life skills, and character. Montessori teachers carefully develop environmental settings, using Montessori materials, which are designed to encourage children to learn on their own. Multi-age groupings support social responsibility and interdependence.

### **Project Approach**

The Project Approach builds on the familiar experiences of children and provides multiple ways of active interaction with people, objects, and the environment. The goal of the approach is to learn more about a topic through active learning. More information is available at <http://ceep.crc.uiuc.edu/poptopics/project.html>.

### **Reggio Emilia Approach**

The approach is based on years of experience in the Reggio Emilia Municipal Infant/Toddler and Preschool Centers in Italy. It places emphasis on children's symbolic languages in the context of a project-oriented curriculum.

### **Waldorf Schools**

Association of Waldorf Schools of North America  
[www.whywaldorfworks.org/](http://www.whywaldorfworks.org/)

The aim of Waldorf education is to educate the whole child—head, heart, and hands. The curriculum is geared to a child's stages of development and brings together all elements of development—intellectual, artistic, spiritual, and movement. The curriculum is designed for children from preschool through high school.

Additional information about curricula is available in the Curriculum section of NCCIC's Web site at <http://nccic.acf.hhs.gov/topics/topic/index.cfm?topicId=60>.
