The length of sentence and institutional behavior determines the custody level. Offenders with more than eight years to serve are C-5 (maximum security). Offenders with less than 12 months to serve and with good institutional behavior are C-2. Sex offenders who are required to complete the Missouri Sex Offender Program have a minimum custody override of C-4. Escapees are held at C-5 institutions until release. Female offenders are not housed by custody level.

The female population has increased by 10.9% over the last five years and the male population has increased by 1.1%. Over the last five years (2003 – 2008) the female offender population shows the highest gain for DWI and sex crimes at 25.0%. The male offender population shows the highest gain for sex offenses at 14.7%. The largest decreases were for drug offenses at 14.2% for males and 9.5% for females.

### Changes in the Average Sentences (years) of the Institutional Population By Offense Group

TOTAL	8.6	8.7	0.8%	12.5	12.7	2.0%	12.2	12.4	1.7%

While the average sentence length for DWI has gone up by 14.8%, the two largest sized offense groups have decreased in average sentence length. Overall the average sentence has increased by 1.7%. The average sentence can change because of a change in the sentencing or a change in the type of offenders being incarcerated. For example, an increase in the number of violent offenders being incarcerated will increase the average sentence because violent offenses generally have longer sentences than non-violent offenses.

Note: Violent offenses include homicide, robbery, assault, kidnapping, arson 1, armed criminal action and serious weapons offenses (felony class A and B). Sex offenses include RSMo 566 sex offenses and RSMo 568 child abuse offenses, excluding non-support. Drug offenses include RSMo 195 offenses. DWI includes BAC offenses. Nonviolent offenses are other offenses, including property offenses, public order offenses, other weapons offenses and other traffic offenses. Life sentences are computed at 30 years.

+ The felony class of the most populous charge code. The offense may include more than one charge code.

Life Sentences are included and computed at 30 years.

New court commitments include offenders sentenced by the courts to a term commitment. New court commitments do not include offenders sentenced to a 120 day or long term drug program or probation or parole revocations.

Offenders convicted of the attempt of the offense are included.

The felony class is the current felony class for the offense. Some offenses, including Child Molestation 1st and

Endangering the Welfare of a Child have had the felony class of the offense increased during the analysis period.

**Authorized Releases From Prison, FY 1999-2008**

Since the introduction of the new salient factor guideline assessment there has been an increase in the number of offenders released to parole and a reduction in the number of offenders released on the conditional release date (the mandatory release date) or on the expiration of sentence.

The number of females released to parole has more than tripled since 1999. The number of females released to probation has seen a relative plateau since 2005.

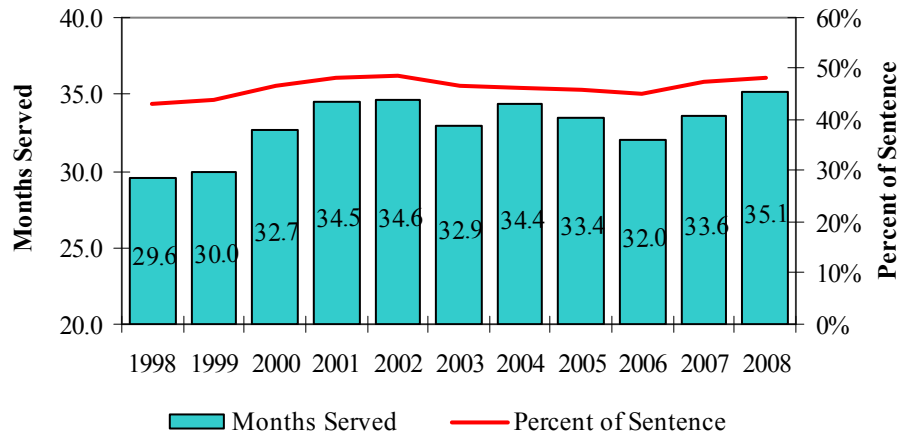

## 7. Time Served to First Release

Time served as a percent of the sentence in FY 2008 increased from 47.3% in FY 2007 to 48.1%. At 35.1 months, the average time served in 2008 is the highest it has been since 1998. This increase can, in the main, be attributed to an increase in time served by offenders convicted of violent and sex offenses. Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). In FY 2007 19% of offenders released had a minimum mandatory prison term, up from 16% in FY 2006. Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense in Chapter 566 RSMO have to complete the Missouri Sex Offender Program before being eligible for a parole release.

## **8. Recidivism Rates by Institutional Releases for FY1999 to FY2008**

There are many ways to measure recidivism and there are no national standards. The rates calculated by the Missouri Department of Corrections and included in the Offender Profile are for offenders first released in the commitment. These are offenders admitted to prison to serve a new commitment and released to either parole, conditional release or on the discharge of the sentence. Excluded from the calculation is the release of parole violators who have previously been returned to prison for a violation of supervision within the commitment. Recidivism rates that include the release of parole violators are higher than the first release recidivism rates.

The recidivism rates measure two outcomes:

1. The first return to prison following the release (technical violation of supervision or new conviction),
2. The first conviction following the release from prison (the new conviction can be a new prison sentence or probation. Because many offenders returned from parole are returned for a technical violation) the new conviction recidivism rate is not a very helpful indicator of new criminal behavior until two or more years from release.

The data for the calculation of the rates are taken from the DOC offender database. Offenses and incarcerations in other states will not be included unless the offender is returned to the custody of the DOC.

Other recidivism rates are given in the Offender Supervision profile for offenders released to probation following a 120-day or long-term drug program and for offenders serving a new court probation.

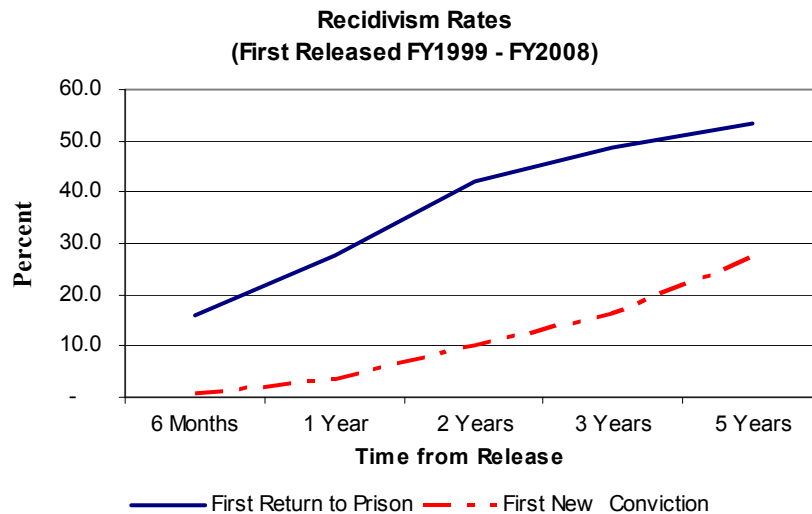

There was a change in the measurement of recidivism in the FY06 Offender Profile. The first release population includes offenders who abscond from a community release center. Because the majority of offenders who abscond are returned to prison, the change has resulted in an increase in the recidivism rate compared to the rates shown on the FY05 Offender Profile. Offenders who absconded from community release centers were previously excluded from the recidivism rates because, before the Board of Probation and Parole took over the operational management of the community release centers, offenders were normally released to community release centers on inmate status.

## Time Served to First Release

Offenders convicted of offenses committed after August 28, 1994 have to serve a minimum prison term if they have committed a dangerous felony (85%) or have prior incarcerations with the Missouri Department of Corrections (40% one prior, 50% two priors and 80% three or more prior incarcerations). Time served includes jail time that is credited to an offender's sentence for incarceration prior to receipt by the Department of Corrections. Offenders convicted of a sex offense as defined in 589.015 are required to complete the Missouri Sex Offender Program before being eligible for parole or conditional release.

Execution is an authorized punishment for offenders convicted of Murder 1<sup>st</sup> degree. Offenders not sentenced to death must serve life without parole. The first execution in Missouri following the US Supreme Court decision authorizing the legality of capital punishment statutes took place in 1989, although the new capital punishment law became effective in Missouri on May 26, 1977. From June 30, 1991 to June 30, 2008 there have been 63 executions.

The statistics count offenders on the first admission by the Department of Corrections for a conviction of Murder 1<sup>st</sup> degree for an offense committed after October 1984. Prior to October 1984, Murder 1<sup>st</sup> degree allowed parole. Re-sentencing and commutation of the death penalty are not included in the charts.

## Offender Needs Score

The Need Score is a risk and needs assessment completed by the supervising probation and parole officer. For offenders on regular supervision it is updated every 60 days. The assessment determines the level of supervision and the need for community programming and supervision strategies. The scoring of the components of the last needs assessment on or before June 30, 2008 is shown after the level of supervision. Offenders in the community release centers are not included in the Needs assessment.

### Supervision Openings for All Offenders FY1999 - FY2008

### Increase in Supervision Openings (FY1999 - FY2008)

	Annual Percent Increase	
	FY1999-FY2004	FY2005-FY2008
Supervision Openings	2.8%	-0.1%
New Probation	-1.3%	-0.9%
120 Day Probation Releases	2.6%	1.2%
Parole Releases	9.6%	0.2%
Absconder Returns	8.8%	-1.3%
Other	16.7%	6.1%

Supervision openings have decreased 0.1% per year in the last four years compared to a 2.8% increase from FY1999 to FY2004. What is of significance to the department, because of the impact upon supervision caseload, is the increase in paroled offenders of 0.2% per year and the yearly increase in 120-Day offenders. Senate Bill 5 enacted in 2003 removed non-violent misdemeanor cases from DOC probation supervision, and this has been the main reason for the decline in new court probations.

Parole Releases	17.0%	7.2%
Absconder Returns	12.9%	1.0%
Other	18.4%	12.1%

Female Supervision openings increased at 2.6% per year in the last four years compared to the 5.3% from 1999 to 2004. What is of significance to the department, because of the impact upon supervision caseload, is that the increases in paroled female offenders have slowed from 17.0% (1999-2004) to 7.2% (2005-2008) annually. Probation following a court stipulated 120-Day program has decrease significantly from 9.4% per year (1999-2004) to 2.1% per year (2005-2008).
